**Equipment Collaborative Welcomes New President Victor Donahue**

*Internationally Renowned Medical Equipment Practice Taps Top Industry Expert to Lead Firm*

**Equipment Collaborative** welcomes **Victor Donahue** as **President**.

Victor brings more than 23 years of experience in the medical equipment industry to lead and extend the service of the firm's expert team to the world's top health care and research institutions.

Having served the health care industry on all sides — from care provider and technology analyst to planning project manager and consulting firm executive — Victor's unique 360° perspective delivers exceptional, patient-centered results to clients. Prior to joining Equipment Collaborative, Victor helped establish and advance internationally renowned equipment consulting practices. As part of his client service for many of health care's top providers, he specialized in driving the development of cutting-edge planning software and operational process streamlining.

"After an extensive nationwide search for the best of the best in the industry, we are so pleased to have Victor join us to direct our equipment practice," stated John S. Crane, AIA, ACHA, Equipment Collaborative Board Member and President and CEO of FKP Architects. "Victor's achievements building and guiding both planning and procurement services over the years made him the perfect fit. We are excited to have a leader of his caliber take the helm of Equipment Collaborative to propel its excellence to the next level to better serve the changing needs of today's health care and research organizations."

Victor is an alumnus of Texas' Amberton University with a Bachelor of Science degree in Technology Management. He also holds an Associate of Science degree in Respiratory Therapy and is a registered Respiratory Therapist.

Equipment Collaborative is a key service line of FKP Architects' integrated design practice focused on *Transforming business by design*® in the health care, research and academic markets. Equipment Collaborative is a leading global provider of equipment planning, procurement, installation and transition services for patient care and research environments. Headquartered in Houston, the firm's clients include the world's top cancer center, MD Anderson Cancer Center; new landmark facilities for the nation's top pediatric hospitals including Nationwide Children's Hospital in Columbus, Ohio and CHOC Children's Hospital in Orange, California; and the exciting 1.2 million square-foot Sidra Medical and Research Center in Education City, Doha, Qatar.
